1.1 PURPOSE AND INTENDED USES OF THE EIR CEQA REQUIREMENTS FOR A FINAL EIR

This Final Environmental Impact Report (FEIR) for the proposed College Park has been prepared in accordance with the California Environmental Quality Act (CEQA) and State CEQA Guidelines. State CEQA Guidelines Section 15132 requires that an FEIR consist of the following:

- The Draft Environmental Impact Report (Draft EIR) or a revision of the draft;
- Comments and recommendations received on the Draft EIR, either verbatim or in summary;
- A list of persons, organizations, and public agencies commenting on the Draft EIR;
- The responses of the lead agency to significant environmental issues raised in the review and consultation process; and
- Any other information added by the lead agency.

In accordance with State CEQA Guidelines Section 15132(a), the Draft EIR is incorporated by reference into this Final EIR.

An EIR must disclose a proposed project's expected environmental impacts, including impacts that cannot be avoided, growth-inducing effects, impacts found not to be significant, and significant cumulative impacts, as well as identify mitigation measures and alternatives to the proposed project that could reduce or avoid its significant adverse environmental impacts. CEQA requires government agencies to consider and, where feasible, minimize significant environmental impacts of proposed development, and creates an obligation for such agencies to balance a variety of public objectives, including economic, environmental, and social factors.

PURPOSE AND USE

The City of Rocklin has determined that a project-level EIR was required for the proposed College Park Project (proposed project) pursuant to the requirements of CEQA. The Draft EIR focuses on the environmental effects related to aesthetics, agriculture and forestry resources, air quality, biological resources, cultural and tribal resources, geology and soils, greenhouse gases, climate change and energy, hazards and hazardous material, hydrology and water quality, noise, land use and planning, population and housing, public services, transportation and circulation, and utilities.

The environmental review process enables interested parties to evaluate the proposed project in terms of its environmental consequences, to examine and recommend potentially feasible methods to eliminate or reduce potential significant adverse impacts, and to consider a reasonable range of alternatives to the project. While CEQA requires that consideration be given to avoiding or lessening significant adverse environmental effects, the lead agency must balance such significant adverse environmental effects against other public objectives, including the economic and social benefits of a project, in determining whether a project should be approved.

This document and the Draft EIR, as amended herein, constitute the FEIR, which will be used as the primary environmental document to evaluate all subsequent planning and permitting actions

associated with the proposed project. Subsequent actions that may be associated with the proposed project are identified in Chapter 2.0, Project Description, of the Draft EIR.

1.2 ENVIRONMENTAL REVIEW PROCESS

The review and certification process for the EIR has involved, or will involve, the following general procedural steps:

NOTICE OF PREPARATION AND INITIAL STUDY

The City of Rocklin circulated a Notice of Preparation (NOP) of an EIR for the proposed project on February 1, 2019 to responsible and trustee agencies, the State Clearinghouse, the Native American Heritage Commission, and the public. A public scoping meeting was held on February 27, 2019 at 5:30 p.m., at the Rocklin City Hall, City Council Chambers (located at 3970 Rocklin Road, Rocklin, CA 95677) in Rocklin to present the project description to the public and interested agencies, and to receive comments from the public and interested agencies regarding the scope of the environmental analysis to be included in the Draft EIR. Concerns raised in response to the NOP were considered during preparation of the Draft EIR. The NOP and responses to the NOP by interested parties are presented in **Appendix A** of the Draft EIR.

NOTICE OF AVAILABILITY AND DRAFT EIR

The City published a public Notice of Availability (NOA) for the Draft EIR on September 24, 2021, thereby soliciting comments from the general public, agencies, organizations, and other interested parties. The NOA was filed with the State Clearinghouse (SCH # 2019012056) and the County Clerk, and was published in a regional newspaper pursuant to the public noticing requirements of CEQA. The Draft EIR was available for public review from September 24, 2021 through November 8, 2021. The Draft EIR contains a description of the project, descriptions of the environmental setting, identification of project impacts, and mitigation measures for impacts found to be significant, as well as an analysis of project alternatives, identification of significant irreversible environmental changes, growth-inducing impacts, and cumulative impacts. The Draft EIR identifies environmental subject areas for which the City determined that there would be no impacts or less than significant impacts, and provides detailed analysis of potentially significant and significant impacts. Comments received in response to the NOA and Draft EIR were considered in preparing the analysis in the FEIR.

RESPONSE TO COMMENTS/FINAL EIR

The City of Rocklin received sixty-four (64) comment letters during the Draft EIR public review period. In accordance with CEQA Guidelines Section 15088, this Final EIR responds to the written comments received. The Final EIR also contains minor edits to the Draft EIR, which are included in Chapter 3.0, Errata. This document and the Draft EIR, as amended herein, constitute the Final EIR.

CERTIFICATION OF THE EIR/PROJECT CONSIDERATION

The City Council of Rocklin will review and consider the Draft EIR together with the Final EIR. In order to take actions based upon the Final EIR (such as approving the proposed project or an alternative), the City Council must first “certify” the document under State CEQA Guidelines section 15090.

Certification consists of three separate findings to the effect that “(1) The final EIR has been completed in compliance with CEQA; (2) The final EIR was presented to the decision-making body of the lead agency, and that the decision-making body reviewed and considered the information contained in the final EIR prior to approving the project; and (3) The final EIR reflects the lead agency’s independent judgment and analysis.” In addressing the first of these three issues, the City Council may find that the Final EIR complies with CEQA if the Council finds that the Final EIR is "adequate and complete." The rule of adequacy generally holds that a Final EIR can be certified if:

- 1) The EIR shows a good faith effort at full disclosure of environmental information; and
- 2) The EIR provides sufficient analysis to allow decisions to be made regarding the proposed project in contemplation of environmental considerations.

Upon review and consideration of the certified Final EIR, the City Council may take action to approve, revise, or reject the proposed project. A decision to approve the proposed project, for which this FEIR identifies significant environmental effects, must be accompanied by written findings in accordance with State CEQA Guidelines Section 15091 and a statement of overriding considerations in accordance with State CEQA Guidelines Section 15093. A Mitigation Monitoring Program, as described below, would also be adopted in accordance with Public Resources Code Section 21081.6(a) and CEQA Guidelines Section 15097 for mitigation measures that have been incorporated into or imposed upon the proposed project to reduce or avoid significant effects on the environment. The City has prepared a Mitigation Monitoring Program to ensure that these measures are carried out during project implementation, in a manner that is consistent with the EIR. It is found in Chapter 4 of this document.

1.3 ORGANIZATION OF THE FINAL EIR

This Final EIR has been prepared consistent with Section 15132 of the State CEQA Guidelines, which identifies the content requirements for Final EIRs. This Final EIR is organized in the following manner:

CHAPTER 1.0 – INTRODUCTION

Chapter 1.0 (this chapter) briefly describes the purpose of the environmental evaluation, identifies the lead agency (the City), summarizes the process associated with preparation and certification of an EIR, and identifies the content requirements and organization of the Final EIR.

CHAPTER 2.0 – COMMENTS ON THE DRAFT EIR AND RESPONSES

Chapter 2.0 provides a list of commentors, copies of written comments made on the Draft EIR (coded for reference), and responses to significant environmental issues raised in those written comments.

CHAPTER 3.0 - ERRATA

Chapter 3.0 consists of minor revisions to the Draft EIR in response to comments on the Draft EIR, as well as minor staff edits. The revisions to the Draft EIR do not change the intent or content of the analysis or mitigation.

CHAPTER 4.0 – FINAL MMRP

Chapter 4.0 consists of a Mitigation Monitoring and Reporting Program (MMRP). The MMRP is presented in a tabular format that presents the impacts, mitigation measure, and responsibility, timing, and verification of monitoring.

CHAPTER 5.0 - REPORT PREPARERS

Chapter 5.0 lists all authors and agencies that assisted in the preparation of the EIR, by name, title, and company or agency affiliation.
