We are writing to thank you for hiring Nathan Medler to graze his goats and sheep on the hill behind our home. Nathan tells us that we were the last of the grazing areas that he was hired to reduce the fire hazard behind our home and others on the old Sunset Golf Course out of bounds areas that were hard to reach with a mower.

We have lived and worked in Rocklin for 40 years. In prior years we were very active in community service. We had this house built 30 years ago and have always worried about fire danger. We have kept some of the weeds trimmed immediately behind our house as a defense against fire danger, but the goats and sheep really did the job you hired them to do and took care of a big problem.

We watched with interest and enthusiasm as they worked with their animals the last couple days of the grazing. They were very professional in the way they treated the neighbors, their livestock as well as the well trained dogs they used to move the animals.

We particularly liked Violet. She is a great dog and was on guard day and night.

Thanks for cleaning up a problem and please consider hiring Nathan again as they did a great job.
